### Interior Lift Truck Services Changes Its Name

Long established materials handling equipment dealer Interior Lift Truck Services Inc. (ILT) is changing its operating name to Leavitt Machinery.

ILT has served BC's Southern Interior for over twenty years and currently has operations in Kamloops, Kelowna, Vernon and Penticton. The company was purchased in the mid-nineteen nineties by Finning International. In 2001, Leavitt Machinery acquired Finning's materials handling division, which included Interior Lift Truck Services.

ILT sells, services and rents forklifts, aerial equipment and other related machinery. It also provides parts and operator training. All phone numbers, locations and personnel will remain the same.

"The amalgamation of ILT into Leavitt Machinery will result in expanded services and a wider range of equipment for customers," says Shawn Denevers, Leavitt Manager for Southern Interior.

Leavitt Machinery is Western Canada's largest supplier of materials handling and aerial equipment. It has 15 locations throughout BC and Alberta.
